The Atlantic

Connection May 04 2021 Focusing on the interconnections of

the Atlantic world from 1450-1900, The Atlantic Connection examines the major themes of Atlantic history. During this period, ships, goods, diseases, human beings and ideas flowed across the ocean, tying together the Atlantic basin in a complex web of relationships. Divided into five main thematic sections while maintaining a broadly chronological structure, this book considers key cultural themes such as gender, social developments, the economy, and ideologies as well as: - the role of the Atlantic in ensuring European dominance - the

creation of a set of societies with new cultural norms and philosophical ideals that continued to evolve and to transform not only the Atlantic, but the rest of the world - the contestation over rights and justice that emerged from the Atlantic world which continues to exist as a significant issue today. The Atlantic Connection is shaped by its exploration of a key question: how did Europe come to dominate the Atlantic if not through its technological prowess? Adeptly weaving a multitude of events into a larger analytical narrative, this book provides a fascinating insight

into this complex region and will be essential reading for students of Atlantic history. [Networks and Connections in Legal History](#) Feb 13 2022 Explores networks of lawyers, legislators and litigators, and how they shape legal development in Britain and the world.

Connections in the History and Systems of Psychology Sep 08 2021 This comprehensive, scholarly text offers extensive biographical detail and full coverage of psychology's pre-19th century philosophical and scientific roots. The authors make connections between recent developments in

psychometrics and biological, social, and cognitive psychology and their historical roots through current articles and references. This critical-thinking approach, combined with groundbreaking pedagogy, makes the text interesting and accessible to students and helps them understand the thinking processes that led to major psychological discoveries, as well as how they relate to contemporary specialty areas. Of the nearly 200 up-to-date references incorporated into the text, more than 100 are dated after 2000 and the remainder from 1990–2000. A timeline of notable

psychological and historical events appears inside the front and back covers of the text for easy access. Timelines or chronologies for each chapter connect developments in psychology to world events in politics, science, and the arts. The text provides extensive coverage of women and minorities in a field dominated by Caucasian men.

Transport and Its Place in History

Dec 11 2021 Transport and mobility history is one of the most exciting areas of historical research at the present. As its scope expands, it entices scholars working in fields as diverse as historical geography,

management studies, sociology, industrial archaeology, cultural and literary studies, ethnography, and anthropology, as well as those working in various strands of historical research. Containing contributions exploring transport and mobility history after 1800, this volume of eclectic chapters shows how new subjects are explored, new sources are being encountered, considered and used, and how increasingly diverse and innovative methodological lenses are applied to both new and well-travelled subjects. From canals to Concorde, from freight to

passengers, from screen to literature, the contents of this book will therefore not only demonstrate the cutting edge of research, and deliver valuable new insights into the role and position of transport and mobility in history, but it will also evidence the many and varied directions and possibilities that exist for the field's future development. **Prentice Hall World History** Feb 25 2023 Human history is fascinating and complex. To make world history easier for you to grasp, this textbook emphasizes nine themes. They can help you focus on the key features of

each society and event you read about: Continuity and change; Geography and history; Political and social systems; Religions and value systems; Economics and technology; Diversity; Global interaction; Impact of the individual; Art and literature. - p. xxxii. [Lies My Teacher Told Me](#) Mar 22 2020 Criticizes the way history is presented in current textbooks, and suggests a more accurate approach to teaching American history. **Connections** Sep 27 2020 *Revel for Connections* Mar 02 2021 For courses in world history. American History: Connecting with the Past Nov 17 2019

Connect students to the experience of history. Connect students to success in history. Alan Brinkley's American History demonstrates that history is a dynamic story rather than a static collection of

names and dates. American History shows an ongoing narrative, exploring historical evidence that teaches us about the past while revealing connections to the present. Known for its clear, single, balanced voice and impeccable scholarship, American History, Alan Brinkley's best-selling survey text propels students to think critically about the many forces that continually create and re-create the history of the United States. In this wide-ranging narrative, Alan Brinkley shows the diversity and complexity of the nation and of our understanding of its history—an understanding that

continues to evolve both in the events of the present and in our reexamination of new evidence and perspectives on the past. This 14th edition features a new series of Source essays, superior in-text learning tools, four new America in the World essays, and extensive content updates that demonstrate how a new generation of historians and of historical actors continues to shape the American story. And now, the most exciting of all, Alan Brinkley's American History offers Connect History, an innovative online assignment and assessment platform, which combines a fully

integrated eBook with powerful learning and teaching tools. Tools that make assessment easier, learning more engaging, and studying more efficient. For example within Connect History, a groundbreaking adaptive diagnostic, LearnSmart, provides a personalized study experience for each student ensuring the mastery of basic chapter content. Additionally with Connect History, engaging interactivities such as Critical Missions immerse students in pivotal historical events, asks them to explore these situations, and then, make recommendations based on their

findings. Connect History sharpens students' analytical skills, increases historical understanding, and improves overall course success.

The Inner Life of Empires Dec 19

2019 The birth of the modern world as told through the remarkable story of one eighteenth-

century family They were abolitionists, speculators, slave owners, government officials, and occasional politicians. They were observers of the anxieties and dramas of empire. And they were from one family. The Inner Life of Empires tells the intimate history of the Johnstones--four sisters and seven brothers who lived in Scotland and around the globe in the fast-changing eighteenth century. Piecing together their voyages, marriages, debts, and lawsuits, and examining their ideas, sentiments, and values, renowned historian Emma Rothschild illuminates a tumultuous period

that created the modern economy, the British Empire, and the philosophical Enlightenment. One of the sisters joined a rebel army, was imprisoned in Edinburgh Castle, and escaped in disguise in 1746. Her younger brother was a close friend of Adam Smith and David Hume. Another brother was fluent in Persian and Bengali, and married to a celebrated poet. He was the owner of a slave known only as "Bell or Belinda," who journeyed from Calcutta to Virginia, was accused in Scotland of infanticide, and was the last person judged to be a slave by a court in the British isles. In

Grenada, India, Jamaica, and Florida, the Johnstones embodied the connections between European, American, and Asian empires. Their family history offers insights into a time when distinctions between the public and private, home and overseas, and slavery and servitude were in constant flux. Based on multiple archives, documents, and letters, *The Inner Life of Empires* looks at one family's complex story to describe the origins of the modern political, economic, and intellectual world.

**Researching
History Education**

Nov 29 2020 "The

authors' research is well known and among the most important American works being done on how children learn history. It is thus a great idea to gather this pivotal research in one place. The volume offers a new perspective through the authors' reflections on the research process. It is profound without pomposity, ideal for the intended audience; the tone is just right. There really isn't another book that does what this one does."

Stephen J. Thornton, University of South Florida
Researching History Education combines a selection of Linda Levstik's and Keith Barton's previous work on teaching

and learning history with their reflections on the process of research. These studies address students' ideas about time, evidence, significance, and agency, as well as classroom contexts of history education and broader social influences on students' and teacher's thinking. These pieces—widely cited in history and social studies education and typically required reading for students in the area—were chosen to illustrate major themes in the authors' own work and trends in recent research on history education. In a series of new chapters written especially for this

volume, the authors introduce and reflect on their empirical studies and address three issues suggested in the title of the volume: theory, method, and context. Although research on children's and adolescents' historical understanding has been the most active area of scholarship in social studies in recent years, as yet there is little in-depth attention to research methodologies or to the perspectives on children, history, and historical thinking that these methodologies represent. This book fills that need. The authors' hope is that it will help scholars draw from

the existing body of literature in order to participate in more meaningful conversations about the teaching and learning of history. *Researching History Education* provides a needed resource for novice and experienced researchers and will be especially useful in research methodology courses, both in social studies and more generally, because of its emphasis on techniques for interviewing children, the impact of theory on research, and the importance of cross-cultural comparisons.

This volume explores this connectivity by showing how people from eastern and central parts of Europe have positioned themselves within global processes while, in turn, also shaping them. The contributions examine different fields of action such

as economy, arts, international regulations and law, development aid, and migration, focusing on the period between the middle of the nineteenth century and the end of the Cold War. The authors uncover spaces of interaction and emphasize that internal and external entanglements have established East-Central Europe as a distinct region. Understanding the connectedness of this subregion is stimulating for the historiography of East-Central Europe as it is for the field of global history. **World History: Connections to Today** May 16 2022 To purchase or

Our History Is the Future Oct 29 2020 How two centuries of Indigenous resistance created the movement proclaiming “Water is life” In 2016, a small protest encampment at the Standing Rock Reservation in North Dakota,

initially established to block construction of the Dakota Access oil pipeline, grew to be the largest Indigenous protest movement in the twenty-first century. Water Protectors knew this battle for native sovereignty had already been fought many times before, and that, even after the encampment was gone, their anticolonial struggle would continue. In *Our History Is the Future*, Nick Estes traces traditions of Indigenous resistance that led to the #NoDAPL movement. *Our History Is the Future* is at once a work of history, a manifesto, and an intergenerational

story of resistance. [The Invention of Yesterday](#) Oct 09 2021 From language to culture to cultural collision: the story of how humans invented history, from the Stone Age to the Virtual Age Traveling across millennia, weaving the experiences and world views of cultures both extinct and extant, *The Invention of Yesterday* shows that the engine of history is not so much heroic (battles won), geographic (farmers thrive), or anthropogenic (humans change the planet) as it is narrative. Many thousands of years ago, when we existed only as countless small autonomous bands

of hunter-gatherers widely distributed through the wilderness, we began inventing stories--to organize for survival, to find purpose and meaning, to explain the unfathomable. Ultimately these became the basis for empires, civilizations, and cultures. And when various narratives began to collide and overlap, the encounters produced everything from confusion, chaos, and war to cultural efflorescence, religious awakenings, and intellectual breakthroughs. Through vivid stories studded with insights, Tamim Ansary illuminates the world-historical

consequences of the unique human capacity to invent and communicate abstract ideas. In doing so, he also explains our ever-more-intertwined present: the narratives now shaping us, the reasons we still battle one another, and the future we may yet create.
