Over the past 10 years, the Gen. Accounting Office (GAO) & others have raised concerns about the U.S. Commission on Civil Rights (CR). GAO was asked to assess: (1) the adequacy of the CR's project mgmt. procedures, (2) whether the CR's controls over contracting services & managing contracts are sufficient, & (3) the extent of recent oversight of the CR's financial activities. GAO recommends, among other things, that the CR adopt procedures that provide for increased commissioner involvement in projects; establish greater controls over its contracting activities in order to be in compliance with Federal regulations; & take steps to meet the financial statement preparation & audit requirements of the Accountability of Tax Dollars Act of 2002. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. Includes Annual report. *Disruptive Prisoners* reconstitutes the history of Canada's federal prison system in the mid-twentieth century through a process of collective biography - one involving prisoners, administrators, prison reformers, and politicians. This social history relies on extensive archival research and access to government documents, but more importantly, uses the penal press materials created by prisoners themselves and an interview with one of the founding penal press editors to provide a unique and unprecedented analysis. *Disruptive Prisoners* is grounded in the lived experiences of men who were incarcerated in federal penitentiaries in Canada and argues that they were not merely passive recipients of intervention. Evidence indicates that prisoners were active agents of change who advocated for and resisted the initiatives that were part of Canada's "New Deal in Corrections." While prisoners are silent in other criminological and historical texts, here they are central figures: the juxtaposition of their voices with the official administrative, parliamentary, and government records challenges the dominant tropes of progress and provides a more nuanced and complicated reframing of the post-Archambault Commission era. The use of an alternative evidential base, the commitment of the authors to integrating subaltern perspectives, and the first-hand accounts by prisoners of their experiences of incarceration makes this book a highly readable and engaging glimpse behind the bars of Canada's federal prisons. The essential guide by one of America's leading doctors to how digital technology enables all of us to take charge of our health A trip to the doctor is almost a guarantee of misery. You'll make an appointment months in advance. You'll probably wait for several hours until you hear "the doctor will see you now"-but only for fifteen minutes! Then you'll wait even longer for lab tests, the results of which you'll likely never see, unless they indicate further (and more invasive) tests, most of which will probably prove unnecessary (much like physicals themselves). And your bill will be astronomical.

In *The Patient Will See You Now*, Eric Topol, one of the nation's top physicians, shows why medicine does not have to be that way. Instead, you could use your smartphone to get rapid test results from one drop of blood, monitor your vital signs both day and night, and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor, all at a small fraction of the cost imposed by our modern healthcare system. The change is powered by what Topol calls medicine's "Gutenberg moment." Much as the printing press took learning out of the hands of a priestly class, the mobile internet is doing the same for medicine, giving us unprecedented control over our healthcare. With smartphones in hand, we are no longer beholden to an impersonal and paternalistic system in which "doctor knows best." Medicine has been digitized, Topol argues; now it will be democratized. Computers will replace physicians for many diagnostic tasks, citizen science will give rise to citizen medicine, and enormous data sets will give us new means to attack conditions that have long been incurable. Massive, open, online medicine, where diagnostics are done by Facebook-like comparisons of medical profiles, will enable real-time, real-world research on massive populations. There's no doubt the path forward will be complicated: the medical establishment will resist these changes, and digitized medicine inevitably raises serious issues surrounding privacy. Nevertheless, the result—better, cheaper, and more human health care—will be worth it. Provocative and engrossing, *The Patient Will See You Now* is essential reading for anyone who thinks they deserve better health care. That is, for all of us.

The United Nations Arms Trade Treaty became binding international law in late 2014, and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by States Parties, there exists controversy as to the meaning of certain key provisions. Furthermore, the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty, but does not detail how such a body should be established and how it should effectively function. *The Arms Trade Treaty: A Commentary* explains in detail each of the treaty provisions, the parameters for prohibitions or the denial of transfers, international cooperation and assistance, and implementation obligations and mechanisms. As states ratify and implement the Treaty over the next few years, the commentary provides invaluable guidance to government officials, commentators, and scholars on the meaning of its contentious provisions. This volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the Arms Trade Treaty regulates. It covers international human rights, trade, disarmament, humanitarian law, criminal law, and state-to-state use of force, as well as the application of the treaty to non-state actors.

The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts. The defeat and death of the evil Wulfgar should inspire a time of rejoicing throughout Eutracia. But Prince Tristan grieves. Not only is his beloved wife dead, but across the Sea of Whispers, in the island fortress known as the Citadel, Wulfgar's bride, the sorceress Serena, plots to continue her husband's nefarious plans, aided by the Scroll of the Vagaries and the advice of the otherworldly Heretics. Although the ranks of Tristan's faithful soldiers were decimated in recent battle, the prince nevertheless plans a bold surprise attack. But on the eve of the mission, disaster strikes. From behind the towering azure wall of magical energy in the forbidding face of the massive Tolenka Mountains comes Xanthus, a powerful warrior dispatched by the Heretics to bring Tristan into their mysterious realm. A master of a mystical martial art against which even the great swordsman Tristan is helpless, Xanthus launches a reign of terror against Eutracia's innocent subjects, compelling Tristan to journey behind the azure wall. There, in a magical land as beautiful as it is violent, Tristan will learn the shocking truth about the destiny he and Shailiha, his sister, will share. In Tristan's absence, Shailiha must lead the fleet of Black Ships against the Citadel, accompanied by the wizards Faegan and Wigg and the beautiful pirate queen Tyranny. But unknown to them, Serena has prepared a deadly trap with hellish creatures summoned by the Heretics. And as Shailiha's troops sail blindly into danger, Serena is preparing a spell unlike anything the world has ever seen—a spell powerful enough to defeat death itself.
