**Master the Art of Swimming** Nov 04 2021

Swimming improves your flexibility, tones your body and can help to boost your self-esteem and produce a sense of well being. It is the nation's most popular sporting activity with 11.9 million people swimming regularly. However, most people don't know how to swim properly. This book is based on a 35-year voyage of discovery into the art of swimming. Steven Shaw's method takes the Alexander Technique into the

swimming pool - focusing on releasing tension from the head, neck and back. Steven has evolved a unique way of breaking down strokes into a series of therapeutic movements, which can be practised individually or with a partner, in a pool or on dry land. These provide the building blocks, which combine to make it possible for anyone to recraft their own strokes in a way that promote good body use and avoid injuries. Instead of performing physical actions in an automatic way, you begin to learn body awareness. This way of swimming not only feels freer and more open, it is graceful and has a sense of flow, often absent from the way many people swim. Shaw looks at the most popular

strokes - front crawl, back stroke, breast stroke and butterfly - focusing on maximum efficiency and minimum strain.

Water Safety with Swimmy is a fun book about Swimmy and his 5 friends and teaches 10 very

important Water Safety Rules as well as giving a summary of the rules at the end. Please read this book with your children and discuss the rules each time you visit a pool, lake, ocean, or have any swimming experience. For older children, the book can be memorized by singing the rhyme to the tune of "Twinkle Twinkle Little Star." Praise for Water Safety with Swimmy: ""Every child needs to know these rules. Since we have a swimming pool, I will be sharing this book with my 3 year old grandson when he visits next time."" Jack Canfield, Coauthor, Chicken Soup for the Parent's Soul ""This book should be on the bookshelf of every parent of a small child and read to them frequently. Water safety rules are a necessary part of parenting. Carolanne makes teaching them easy and fun."" B.E. Van Loon, Author and Parenting Expert.

*The Things They Carried* Apr 28 2021 A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become

a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

**The American Red Cross First Aid and Safety Handbook** Feb 24 2021 The first moments after an injury occurs are the most critical. This authoritative guidebook, based on course materials used by Red Cross chapters across the United States, shows you how to handle every type of first aid emergency. *CPR/AED for the Professional Rescuer* Feb 07 2022 This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual

and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and

knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

*Water* Sep 21 2020 An intellectual history of America's water management philosophy Humans take more than their geological share of water, but they do not benefit from it equally. This imbalance has created an era of intense water scarcity that affects the security of individuals, states, and the global economy. For many, this brazen water grab and the social

inequalities it produces reflect the lack of a coherent philosophy connecting people to the planet. Challenging this view, Jeremy Schmidt shows how water was made a “resource” that linked geology, politics, and culture to American institutions. Understanding the global spread and evolution of this philosophy is now key to addressing inequalities that exist on a geological scale. *Water: Abundance, Scarcity, and Security in the Age of Humanity* details the remarkable intellectual history of America’s water management philosophy. It shows how this philosophy shaped early twentieth-century conservation in the United States, influenced American international development programs, and ultimately shaped programs of global governance that today connect water resources to the Earth system. Schmidt demonstrates how the ways we think about water reflect specific public and societal values, and illuminates the process by which the American approach to water management came to dominate the global

conversation about water. Debates over how human impacts on the planet are connected to a new geological epoch—the Anthropocene—tend to focus on either the social causes of environmental crises or scientific assessments of the Earth system. Schmidt shows how, when it comes to water, the two are one and the same. The very way we think about managing water resources validates putting ever more water to use for some human purposes at the expense of others.

*The Dark Side* Apr 16 2020 *The Dark Side* is a dramatic, riveting, and definitive narrative account of how the United States made self-destructive decisions in the pursuit of terrorists around the world—decisions that not only violated the Constitution, but also hampered the pursuit of Al Qaeda. In spellbinding detail, Jane Mayer relates the impact of these decisions by which key players, namely Vice President Dick Cheney and his powerful, secretive adviser David Addington, exploited September 11 to further a long held agenda to enhance presidential powers to a degree never known in U.S. history, and obliterate Constitutional

protections that define the very essence of the American experiment. With a new afterward. Commentary on the Third Geneva Convention  
Dec 05 2021 The application and interpretation of the four Geneva Conventions of 1949 and their two Additional Protocols of 1977 have developed significantly in the seventy years since the International Committee of the Red Cross (ICRC) first published its Commentaries on these important humanitarian treaties. To promote a better understanding of, and respect for, this body of law, the ICRC commissioned a

comprehensive update of its original Commentaries, of which this is the third volume. The Third Convention, relative to the treatment of prisoners of war and their protections, takes into account developments in the law and practice in the past seven decades to provide up-to-date interpretations of the Convention. The new Commentary has been reviewed by humanitarian law practitioners and academics from around the world. This new Commentary will be an essential tool for anyone involved with international humanitarian law.

Fighting the Current May 18 2020 In 1926, Gertrude Ederle became the first female to swim the English Channel—and broke the existing record time in doing so. Although today she is considered a pioneer in women’s swimming, women were swimming competitively 50 years

earlier. This historical book details the early period of women's competitive swimming in the United States, from its beginnings in the nineteenth century through Ederle's astonishing accomplishment. Women and girls faced many obstacles to safe swimming opportunities, including restrictive beliefs about physical abilities, access to safe and clean water, bathing suits that impeded movement and became heavy in water, and opposition from official sporting organizations. The stories of these early swimmers plainly show how far female athletes have come.
