Paper Things Feb 19 2023 When forced to choose between staying with her guardian and being with her big brother, Ari chose her big brother. There's just one problem—Gage doesn't actually have a place to live. When Ari's mother died four years ago, she had two final wishes: that Ari and her older brother, Gage, would stay together always, and that Ari would go to Carter, the middle school for gifted students. So when nineteen-year-old Gage decides he can no longer live with their bossy guardian, Janna, Ari knows she has to go with him. But it's been two months, and Gage still hasn't found them an apartment. He and Ari have been "couch surfing," staying with Gage's friend in a tiny apartment,

crashing with Gage's girlfriend and two roommates, and if necessary, sneaking into a juvenile shelter to escape the cold Maine nights. But all of this jumping around makes it hard for Ari to keep up with her schoolwork, never mind her friendships, and getting into Carter starts to seem impossible. Will Ari be forced to break one of her promises to Mama? Told in an open, authentic voice, this nuanced story of hiding in plain sight may have readers thinking about homelessness in a whole new way.

Teaching Language Arts in Middle Schools Oct 03 2021 This text is designed specifically to meet the needs of preservice teachers who have had little experience working in middle-grade classrooms. Three ideas are central: * teaching language arts at the middle level is a complex activity that demands expertise in the use of a variety of strategies, * reading and writing are key processes of language arts study, but so are speaking, listening, and viewing/visually representing, and * teaching the processes of effective communication is crucial, but middle school students must also begin to learn the content of the field--literature, language, and media. Teaching Language Arts in Middle Schools gives balanced attention to various teaching strategies, processes, and content, demonstrating how all of these connect to improve students' abilities to communicate. In this text: *Research and theory are summarized and applied to practice *A non-prescriptive approach is integrated with practical information *Debates in the field are acknowledged *Additional reading and research are emphasized *The author's voice and point of view are explicit

Negotiating Opportunities Nov 04 2021 In Negotiating Opportunities, Jessica McCrory Calarco argues that the middle class has a negotiated advantage in school. Drawing on five years of ethnographic fieldwork, Calarco traces that negotiated advantage from its origins at home to its consequences at school. Through their parents' coaching, working-class students learn to follow rules and work through problems independently. Middle-class students learn to challenge rules and request assistance, accommodations, and attention in excess of what is fair or required. Teachers typically grant those requests, creating advantages for middle-class students. Calarco concludes with recommendations, advocating against deficit-oriented programs that teach

middle-class behaviors to working-class students. Those programs ignore the value of working-class students' resourcefulness, respect, and responsibility, and they do little to prevent middle-class families from finding new opportunities to negotiate advantages in school.

Renaissance Humanism, from the Middle Ages to Modern Times May 18 2020 Starting with an essay on the Renaissance as the concluding phase of the Middle Ages and ending with appreciations of Paul Oskar Kristeller, the great twentieth-century scholar of the Renaissance, this new volume by John Monfasani brings together seventeen articles that focus both on individuals, such as Erasmus of Rotterdam, Angelo Poliziano, Marsilio Ficino, and Niccolò Perotti, and on large-scale movements, such as the spread of Italian humanism, Ciceronianism, Biblical criticism, and the Plato-Aristotle Controversy. In addition to entering into the persistent debate on the nature of the Renaissance, the articles in the volume also engage what of late have become controversial topics, namely, the shape and significance of Renaissance humanism and the character of the Platonic Academy in Florence.

Trade, Globalization and Development Jan 06 2022 This book was written in honour of Professor Kalyan K. Sanyal, who was an excellent educator and renowned scholar in the field of international economics. One of his research papers co-authored with Ronald Jones, entitled "The Theory of Trade in Middle Products" and published in American Economic Review in 1982, was a seminal work in the field of international trade theory. This paper would go on to inspire many subsequent significant works by researchers across the globe on trade in intermediate goods. The larger impact of any paper, beyond the number of citations, lies in terms of the passion it sparks among younger researchers to pursue new questions. Measured by this yardstick, Sanyal's contribution in trade theory will undoubtedly be regarded as historic. After completing his Ph.D. at the University of Rochester he joined the Department of Economics at Calcutta University in the early 1980s and taught trade theory there for almost three decades. His insights, articulation and brilliance in teaching international economics have influenced and shaped the intellectual development of many of his students. After his sudden passing in February 2012, his students and colleagues organized a symposium in his honour at the Department of

Economics, Jadavpur University from April 19 to 20, 2012. This book, a small tribute to his intellect and contribution, has been a follow-up on that endeavour, and a collective effort of many people including his teachers, friends, colleagues and students. In a nutshell it discusses intermediation of various kinds with significant implications for market integration through trade and finance. That trade can generate many non-trade-service sector links has recently emerged as a topic of growing concern and can trace its lineage back to the idea of the middle product, a recurring concept in Prof. Sanyal's work.

Middle Powers and International Organisations Dec 05 2021 This book provides a unique examination of how a middle power uses international organisations to achieve greater global influence. The authors focus on the OECD, 'the rich man's club' of most of the world's wealthiest nations. It demonstrates how the decision by Australia to apply for membership was a long drawn out process, delayed by political factors. Eventually agreement was reached with assurances that membership would provide access to valuable and timely policy-related information, especially in relation to international trade and finance. In addition, membership would potentially increase influence by providing greater access to its powerful member states at an earlier stage in their policy discussions and agreements.
