The frontier is the place where
cultures meet and rewrite
themselves upon each other's

texts, making it a setting that
many writers and readers of
fiction are drawn to. Here
Spurgeon focuses on three
writers, Cormac McCarthy,
Leslie Marmon Silko, and Ana
Castillo, whose works not only
exemplify the kind of
engagement with the theme of
the frontier that modern
authors make, but also show
the range of cultural voices
that are present in
Southwestern literature. She
considers how the differing
versions of the Western
"mythic" tales are being recast
in a globalized world and
examines the ways in which
they challenge and
accommodate increasingly fluid
and even dangerous racial,

cultural, and international
borders. Georg Guillemín's
visionary approach to the work
of Western novelist Cormac
McCarthy combines an overall
survey of McCarthy's eight
novels in print with a
comprehensive analysis of the
author's evolving
ecopastoralism. Using in-depth
textual interpretations,
Guillemín argues that even
McCarthy's early work is
characterized less by
traditional nostalgia for a lost
pastoral order than by a
radically egalitarian land ethic
that prefigures today's
ecopastoral tendencies in
Western American writing. The
study shows that more than
any of the other landscapes

evoked by McCarthy, the Southwestern desert becomes the stage for his dramatizations of a wild sense of the pastoral. McCarthy's fourth novel, *Suttree*, which is the only one set inside an urban environment, is used in the introductory chapter to discuss the relevant compositional aspects of his fiction and the methodology of the chapters to come. The main part of the study devotes chapters to McCarthy's Southern novels, his keystone work *Blood Meridian*, and the Western novels known as the *Border Trilogy*. The concluding chapter discusses the broader context of American pastoralism and suggests that

McCarthy's ecopastoralism is animistic rather than environmentalist in character. Guillemin shows that the very popular *Border Trilogy* takes McCarthy's ecopastoralism to its culmination, although this is often overlooked precisely because of the simplicity of the plots—picaresque quests. As the trilogy arranges its plots as a search for a life of pastoral harmony (*All the Pretty Horses*), envisions a nomadic version of pastoral (*The Crossing*), and experiences the foreclosure of the pastoral vision anywhere (*Cities of the Plain*), the trilogy as a whole tacitly acknowledges the obsolescence of utopian pastoralism. Increasingly, man

ceases to be the dominant focus of narration, so that the shift from an egocentric to an ecocentric sense of self marks both the heroes and narrators of McCarthy's novels. *NSCA's Essentials of Tactical Strength and Conditioning* is the ideal preparatory guide for those seeking TSAC-F certification. The book is also a great reference for fitness trainers who work with tactical populations such as military, law enforcement, and fire and rescue personnel. Many books and essays have addressed the broad sweep of Texas music—its multicultural aspects, its wide array and blending of musical genres, its historical transformations, and

its love/hate relationship with Nashville and other established music business centers. This book, however, focuses on an essential thread in this tapestry: the Texas singer-songwriters to whom the contributors refer as “ruthlessly poetic.” All songs require good lyrics, but for these songwriters, the poetic quality and substance of the lyrics are front and center. Obvious candidates for this category would include Townes Van Zandt, Michael Martin Murphey, Guy Clark, Steve Fromholz, Terry Allen, Kris Kristofferson, Vince Bell, and David Rodriguez. In a sense, what these songwriters were doing in small, intimate live-

music venues like the Jester Lounge in Houston, the Chequered Flag in Austin, and the Rubaiyat in Dallas was similar to what Bob Dylan was doing in Greenwich Village. In the language of the times, these were “folksingers.” Unlike Dylan, however, these were folksingers writing songs about their own people and their own origins and singing in their own vernacular. This music, like most great poetry, is profoundly rooted. That rootedness, in fact, is reflected in the book’s emphasis on place and the powerful ways it shaped and continues to shape the poetry and music of Texas singer-songwriters. From the coffeehouses and folk clubs

where many of the “founders” got their start to the Texas-flavored festivals and concerts that nurtured both their fame and the rise of a new generation, the indelible stamp of origins is inseparable from the work of these troubadour-poets. Designed to house prisoners only for a short time, a calaboose could be anything from an iron cage to a poured concrete blockhouse. Easily

constructed and more affordable for small communities than a full-sized building, calaboooses once dotted the rural landscape. Though a relic of a bygone era in law enforcement and no longer in use, many calaboooses remain in communities throughout Texas, often hidden in plain sight. In *The Texas Calaboose and Other Forgotten Jails*, William E. Moore has compiled the first guidebook to extant calaboooses in Texas. He explores the history of the calaboose, including its construction, use, and eventual decline, but the heart of the book is in the alphabetically arranged photo tour of calaboooses across the state.

Each entry is accompanied by a vignette describing the unique features of the calaboose at hand, any infamous or otherwise memorable occupants, and the state of the calaboose at present. Most have been long abandoned, but because many remain on city or town property, some have been repurposed into storage buildings or even government offices. In certain ways, these small jails encapsulate the history of outlying communities during a time of transition from the “Wild West” to the twentieth century. Some of the structures have been preserved and cared-for, but despite the stories they can tell, many more are endangered or have

already been lost. This definitive guide to tiny Texas jails serves as a record of a unique and disappearing feature of our heritage. THE STORY: The most controversial and talked about play of the 1998 theatrical season begins: We are going to tell you an old and familiar story. But from that point on, nothing feels quite familiar again. What follows is a story that parallels t Now in its Third Edition, this popular textbook offers valuable information about administering effective reading programs from the pre-elementary through the college level. All chapters have been revised to include the most current information, trends,

and research, and a new chapter has been added on college/university reading programs. Chronicling a literary life that ended not so long ago, Donald Barthelme: The Genesis of a Cool Sound gives the reader a glimpse at the years when Barthelme began to find his literary voice. A revealing look at Donald Barthelme's influences and development, this account begins with a detailed biographical sketch of his life and spans his growth into a true avant-garde literary figure. Donald Barthelme was born in Philadelphia but raised in Houston, the son of a forward-thinking architect father and a literary mother.

Educated at the University of Houston, he became a fine arts critic for the Houston Post; then, following duty in the Korean conflict, he returned to the Post for a short time before becoming editor for Forum literary magazine. After that, he was also director of the Contemporary Arts Museum while writing and publishing his first stories. In the 1960s he moved to New York, where he became editor of Location and was able to practice the art of short fiction in such vehicles as the New Yorker and Harper's Bazaar. In a witty, playful, ironic, and bizarrely imaginative style, he wrote more than one hundred short stories and several novels over

the years. In this literary memoir, Donald Barthelme's former wife, Helen Moore Barthelme, offers insights into his career as well as his private life, focusing especially on the decade they were married, from the mid-fifties to the mid-sixties, a period when he was developing the forms and genres that made him famous. During that time Barthelme was finding his voice as a writer and his short stories were beginning to receive notice. In her memoir, Helen Moore Barthelme writes about Donald's early years and her life with him in Houston and New York. In open, straightforward language she tells about their love for each

other and about the events that finally divided them. She also describes, from the point of view of the person closest to Donald during that time, the making of one of the most original and imaginative American writers of the twentieth century. Scholars of avant-garde American literature will gain insider perspective to one man's life and the years which, for all their myriad joys and downturns, produced some of the best-remembered works in the literary canon. As Anglo Americans moved into the territories of the greater Southwest, they brought with them a desire to reestablish the highest culture of their former

homes: opera, painting, sculpture, architecture, and literature. But their inherited way of life was challenged and reshaped by Native American and Hispanic peoples, and a new, vibrant cultural life resulted. From Houston to Los Angeles, from Tulsa to Tucson, Keith L. Bryant, Jr., traces the development of "high culture" in the Southwest. First appearing on early Spanish maps as the Río Escondido, or hidden river, and later named Río de las Nueces after the abundant pecan trees along its banks, the Nueces today is a stream of seeming contradictions: a river that runs above and below ground; a geographic reminder of a

history both noble and egregious; and a spring-fed stream transformed into a salty, steep-sided channel. From its fresh, clear headwaters on the Edwards Plateau, Margie Crisp and William B. Montgomery follow the river through the mesquite and prickly pear of the South Texas Plains, to the river's end in Nueces and Corpus Christi Bays on the Gulf of Mexico. With vivid prose and paintings, they record their travels as they explore the length of the river on foot, kayak, and fishing boat, ultimately weaving a vivid portrait of today's Nueces. Capturing the river's subtle beauty, abundant wildlife, diverse culture, and unique

history of exploration, conflict, and settlement, they reveal the untold story of this enigmatic river with passion, humor, and reverence. Elise Waerenskjold is known to fans of Texas women writers as "the lady with the pen," from the title of a book of her writings. A forward-looking journalist, she sent letters and articles back to Norway that encouraged others to follow her footsteps to Texas, where a small colony of Norwegian settlers were making a new life alongside—but distinct from—other European immigrants. Undaunted is the first full biography of Waerenskjold during her Texas years, a life story that shows

much about Texas, especially in the Norwegian colonies, from 1847 until near the end of the century. Moreover, it tells the story of a strong and independent thinker who championed women's rights, was pro-Union and against slavery (though her husband was in the Confederate army and was subsequently murdered in Reconstruction-era violence), and left an intriguing body of writing about life on the edges of Texas settlement. Charles Russell's vivid account of Waerenskjold describes not only her influence among her countrymen but also her own life, which was a saga of considerable drama itself. It

offers a clear and entertaining window onto immigrant life in Texas and the issues that shaped women's lives and elicited their talents in an earlier century. A critical survey of over 150 years of Texas women writers, including fiction and nonfiction authors, poets, and dramatists. Each year, more than two million visitors enjoy the attractions of the Western Hill Country, with Uvalde as its portal, and the lower Pecos River canyonlands, which stretch roughly along US 90 from Brackettville, through Del Rio, and on to the west. Amistad National Recreation Area, the Judge Roy Bean Visitors' Center and Botanical Garden, Seminole Canyon State

Park, and the Briscoe-Garner Museum in Uvalde, along with ghost towns, ancient rock art, sweeping vistas, and unique flora and fauna, are just a few of the features that make this distinctive section of the Lone Star State an enticing destination. Now, veteran writer, blogger, and educator Mary S. Black serves up the best of this region's special adventures and secret treasures. From the Frio to Del Rio is chock-full of helpful maps, colorful photography, and tips on where to stay, what to do, and how to get there. In addition there are details for 10 scenic routes, 3 historic forts and 7 state parks and other recreation areas. The purpose

of this study was to determine what factors influence the attrition of Agricultural Education majors at Tarleton State University. This research will assist departmental faculty in determining what key factors attribute toward attrition among current student who were previously enrolled as Agricultural Education majors. According to public graduation records, Tarleton State University has one of the leading programs generating certified Agri-science teachers in Texas. Understanding factors leading to attrition of majors in the program will allow faculty to better utilize resources and increase retention. According to Beggs,

Mullins, Bantham and Taylor (2008) a student's choice of college major represents a major life decision most frequently identified as a regret for the student. Connors (1998) suggested that the future of agricultural education hinges upon the profession being proactive and addressing the issues that secondary agricultural education programs will face. Even with successful recruitment, Dyer, Beja and Ball cite that agriculture programs would have to more than double enrollment to satisfy the growing demand for graduates by both industry and education (2003). Choosing the right major in college is becoming

increasingly important for young students today. Students have to take into account many things when choosing college major, and many factors can influence a student's decision, including parents, coaches, religious figures, or any role models in a student's life. Participation in agriculture clubs such as FFA and 4-H can also have an effect on students' career choices. Recruiting efforts and concerns have and will continue to be an issue in higher education. Understanding factors involved in recruitment is incessantly apparent and merits persistent study for why students attend a specific institution. This study investigated the demographics,

influence of participating in university events and factors influencing students' decision to enroll at Tarleton State University (Tarleton). First-time enrollees were surveyed in fall 2015 and fall 2016 to obtain both demographic information and student perception regarding events hosted at Tarleton. Frequency data provided inferences between influence of attending Tarleton and the factors associated to student perception. Specific degree programs, reputation of Tarleton, and student population size were noted as having the greatest influence on student's decision to attend Tarleton among factors.

Furthermore, frequency data revealed that friends, parents, high school agricultural teachers, and a visit from university faculty members deemed influential among personal contacts. Interesting results identified that 20% of the non-agricultural majors indicated that FFA judging contests were very or extremely influential in their decision to attend Tarleton. Lastly, organized days for tours of campus (Texan Tours) and FFA judging contests were most influential when pre-college activities were considered. As student demographics vary, the impression of a variety of factors continues to play an

integral role in attracting students. Thus, recruitment strategies need to be frequently explored to coincide with changes in student population. Presents Tarleton State University, located in Stephenville, Texas. Notes that it is a part of the Texas A & M University System. Explains that the University includes four academic colleges including, arts and sciences, business administration, agriculture and technology, and education and fine arts. Provides information about academic programs, student services, financial resources, student organizations, and alumni activities. Offers access to the library. Posts contact

information via mailing address, telephone numbers, and e-mail. Presenting the unique vision of an American original . . . Alexandre Hogue, a renowned artist whose career spanned from the 1920s to his death in 1994, inherited the view of an America that imagined itself as filled with limitless potential for improvement, that considered high art and great ideas accessible to ordinary working people, and that saw no reason for an intellectual chasm between a learned elite and the masses. He always viewed himself as a radical, yet his passion stemmed from a deeply conservative idea: that art, culture, and nature should form

a central force in the life of every human being. His well-known Dust Bowl series labeled him as a regionalist painter, but Hogue never accepted that identity. His work reveals the spirit of Texas and the Southwest as he experienced it for nearly a century. In his later years Hogue worked in forms of crisply rendered nonobjective and calligraphic one-liner paintings. Bringing to light new information regarding the Erosion and Oil Industry series, this book gives special attention to lesser known, post-1945 works, in addition to the awe-inspiring Moon Shot and final Big Bend series. Each series—from the hauntingly beautiful Taos

landscapes and prophetic canvases of a dust-covered Southwest to his depictions of the fierce geological phenomena of the Big Bend—serves as a paean to the awesomeness of nature. Houston-based curator and critic Susie Kalil grew close to Hogue from 1986 to 1994, a time during which she interviewed him, considered his oeuvre with him, and came to share his vision of the nature and purposes of art. In Alexandre Hogue she reveals Hogue as he presented himself and his work to her. Collections with Alexandre Hogue's paintings: Musee National D'Art Moderne, Pompidou, Paris Dallas Museum of Art

University of North Carolina at Greensboro The Federal Reserve Bank, Dallas The Williams Companies, Tulsa Take an unforgettable sky excursion over Big Bend with photographer Paul Chaplo as he captures the shapes, textures, and colors of the craggy, weathered landforms people usually see only from the ground—and some places no photographer has gone before. Flying from Marfa, and hanging precariously from the open door of an aircraft, Chaplo shares a hawk's eye view of a fiercely beautiful region, revealing the stark and magnificent landscapes carved by the force of eons of wind and water on the arid,

mountainous country along the Rio Grande. The Aermotor Windmill Company, which commenced operations in Chicago in 1888, is the nation's sole remaining full-time manufacturer of water-pumping machines. The company's imprint on rural America, particularly across the West, is still visible today in the tens of thousands of its windmills that bring water to the earth's surface. Still Turning is the first book to explore the rise of the American windmill through the experience of this important company. Aermotor founder La Verne Noyes and engineer Thomas Perry developed and perfected the all-metal wind

pump in the 1880s. Within a decade, the "mathematical windmill" began to dominate the market. Aermotor continued to expand and innovate. The ruggedness and simplicity of the American mechanical windmill has allowed it to outlast many newer water-pumping technologies over the years with minimal maintenance and oversight. Christopher C. Gillis traces this story and more, from the early days of the company to Aermotor's present-day relevance as it continues to produce its iconic windmills. Still Turning is a significant contribution not only to the history of wind power but also to the history of

American enterprise. Rafael Carrera (1814-1865) ruled Guatemala from about 1839 until his death. Among Central America's many political strongmen, he is unrivaled in the length of his domination and the depth of his popularity. This "life and times" biography explains the political, social, economic, and cultural circumstances that preceded and then facilitated Carrera's ascendancy and shows how Carrera in turn fomented changes that persisted long after his death and far beyond the borders of Guatemala. Features the Geology and Earth Science Division within the Department of Physical and Environmental Sciences at

Tarleton State University in Stephenville, Texas. Posts contact information via street address and telephone number. Contains course descriptions and photographs. Offers access to faculty and student pages, field study information, and the Geology Club. Provides access to other geology departments and the university's home page. Links to other geoscience resources. Offers a new reading of the history of the colonization of North America and the dispossession of its indigenous peoples. In 1932 C.E. Doolin, the operator of a struggling San Antonio confectionery, purchased for \$100 the recipe for a fried corn chip product and a crude

device used to make it, along with a list of nineteen customer accounts. From that humble beginning sprang Fritos ('fries' in Spanish), a product that, thanks to Doolin's marketing ingenuity and a visionary approach to food technology, would become one of the best-known brands in America. Fritos Pie is an insider's look at the never-before-told story of the Frito Company written by Kaleta Doolin, daughter of the company's founder. Filled with personal anecdotes, more than 150 recipes, and stories, this book recounts the company's early days, the 1961 merger that created Frito-Lay, Inc., and beyond. The history of John Tarleton's college in

Stephenville, Texas was the setting for the story of Tarleton's Baptist student ministry that began in 1921. The Baptist Student Union met on campus until 1947 when the Baptist General Convention of Texas purchased property for \$12,000 from the Jones family one block from the college campus. In 1947, the old house was converted into space for the new ministry with living quarters in the back for the first full-time B.S.U. Director, Felix Gresham. Further improvements to the old building continued until the second and current Baptist student center was built in 1986. The land was purchased for \$20,000 by the Erath

Baptist Association in 1979 and then given to the Baptist General Convention. The Tarleton Baptist Student Ministry continues to meet the spiritual needs of thousands of students through Beach Reach, Mission trips, Noon Luncheons, Bible Studies, Leadership Training, and Prayer groups.
