Averroes' Middle Commentary on Aristotle's Poetics Mar 28 2021 Aristotle's Poetics has held the attention of scholars and authors through the ages, and Averroes has long been known as "the commentator" on Aristotle. His Middle Commentary on Aristotle's Poetics is important because of its striking content. Here, an author steeped in Aristotle's thought and highly familiar with an entirely different poetical tradition shows in careful detail what is commendable about Greek poetics and commendable as well as blameworthy about Arabic poetics.

Transcendentalism: Essential Essays of Emerson and Thoreau: Literary Touchstone Classic Jun 11 2022

Michel de Montaigne Dec 05 2021 One of France's great Renaissance thinkers, Montaigne was remarkably modern in his views. These highly readable essays reflect his thoughts on poetry, philosophy, theology, law, literature, education, and world exploration.

Kate Chopin and Catholicism Jan 14 2020 This book explores the Catholic aesthetic and mystical dimensions in Kate Chopin ' s fiction within the context of an evolving American Catholicism in the late nineteenth and early twentieth centuries. Through a close reading of her novels and numerous short stories, *Kate Chopin and Catholicism* looks at the ways Chopin represented Catholicism in her work as a literary device that served on multiple levels: as an aesthetic within local color depictions of Louisiana, as a trope for illuminating the tensions surrounding nineteenth-century women ' s struggles for autonomy, as a critique of the Catholic dogma that subordinated authenticity and physical and emotional pleasure, and as it pointed to the distinction between religious doctrine and mystical experience, and enabled the articulation of spirituality beyond the context of the Church. This book reveals Chopin to be not only a literary visionary but a writer who saw divinity in the natural world.

The Box-Car Children May 10 2022 Four orphans discover an abandoned boxcar and move in, embarking on a life of self-reliance and hard work but also freedom and adventure. Beautiful hardcover version of original 1924 edition.

How We Think Feb 24 2021 Our schools are troubled with a multiplication of studies, each in turn having its own multiplication of materials and principles. Our teachers find their tasks made heavier in that they have come to deal with pupils individually and not merely in mass. Unless these steps in advance are to end in distraction, some clew of unity, some principle that makes for simplification, must be found. This book represents the conviction that the needed steadying and centralizing factor is found in adopting as the end of endeavor that attitude of mind, that habit of thought, which we call scientific. This scientific attitude of mind might, conceivably, be quite irrelevant to teaching children and youth. But this book also represents the conviction that such is not the case; that the native and unspoiled attitude of childhood, marked

by ardent curiosity, fertile imagination, and love of experimental inquiry, is near, very near, to the attitude of the scientific mind. If these pages assist any to appreciate this kinship and to consider seriously how its recognition in educational practice would make for individual happiness and the reduction of social waste, the book will amply have served its purpose. It is hardly necessary to enumerate the authors to whom I am indebted. My fundamental indebtedness is to my wife, by whom the ideas of this book were inspired, and through whose work in connection with the Laboratory School, existing in Chicago between 1896 and 1903, the ideas attained such concreteness as comes from embodiment and testing in practice. It is a pleasure, also, to acknowledge indebtedness to the intelligence and sympathy of those who cooperated as teachers and supervisors in the conduct of that school, and especially to Mrs. Ella Flagg Young, then a colleague in the University, and now Superintendent of the Schools of Chicago.

Self-Reliance and Other Essays Jun 18 2020 Essayist, poet, and philosopher, Ralph Waldo Emerson (1803 – 1882) propounded a transcendental idealism emphasizing self-reliance, self-culture, and individual expression. The six essays and one address included in this volume, selected from *Essays, First Series* (1841) and *Essays, Second Series* (1844), offer a representative sampling of his views outlining that moral idealism as well as a hint of the later skepticism that colored his thought. In addition to the celebrated title essay, the others included here are "History," "Friendship," "The Over-Soul," "The Poet," and "Experience," plus the well-known and frequently read Harvard Divinity School Address.

Nature and Other Essays Jul 12 2022 A collection of essays from the father of the American transcendentalism, including "Nature," "Self-Reliance," "Love," and "Art." Ralph Waldo Emerson's famous essay "Nature" declared that understanding nature was the key to

understanding God and reality, and laid the groundwork for transcendentalism. His legacy of boldly questioning the doctrine of his day and connecting with nature will resonate with today's readers in search of meaning and enlightenment. Essays include "Nature" (1836) and Emerson's first series, published in 1841: "History," "Self-Reliance," "Compensation," "Spiritual Laws," "Love," "Friendship," "Prudence," "Heroism," "The Over-Soul," "Circles," "Intellect," and "Art." *Nature and Other Essays* joins Gibbs Smith's best-selling *Wilderness* series. Standing beside the works of his protégé Henry David Thoreau, as well as John Muir, Mark Twain, Walt Whitman, and Jack London, these essays are reissued to encourage and inspire philosophers, travelers, campers, and contemporary naturalists. Ralph Waldo Emerson (May 25, 1803 – April 27, 1882) was a famous lecturer, philosopher, poet, and writer. He led the transcendentalist movement of the 1800s, mentored Henry David Thoreau, and was a pioneer of multiculturalism in American writing.

"Beyond all doubt this . . . volume will extend the sphere of Emerson's influence." — Springfield Republican. Biographical notes.

Human Dimension and Interior Space Aug 21 2020 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in

the physical fit, or interface, between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.

Always in God's Hands Aug 01 2021 This year, get to know the true Jonathan Edwards—and see the hand of God in your own life like never before. Jonathan Edwards is one of the most respected early American theologians. In Always in God ’ s Hands, Owen Strachan recovers the real Jonathan Edwards—the thinker, the compassionate father, the courageous reformer—as opposed to the caricature of him that is often presented. Edwards believed God was ever-present in each of our lives, caring and encouraging us in every moment. In a moving letter to his daughter, he reminds her of that comforting truth by describing her as “ always in God ’ s hands. ” Through daily

quotes from Edwards ' s letters and sermons, this inspirational devotional reveals the soaring theology and comforting spirituality of one of history ' s most faithful and gifted pastors. With each meditation, compiler Owen Strachan offers refreshing and relevant insights, encouraging you in your walk with God.

Candide Feb 13 2020 *Candide* is the picaresque tale of the titular character ' s fantastical journey from an insular, idealized life in a picturesque castle through the difficulties and evils of the real world. Satirical, comical, witty, and cutting, *Candide* was widely banned in its day for containing blasphemous and seditious concepts. Despite that, it survived controversy to become an important book in the Western literary heritage. Today *Candide*

remains a breezy and darkly funny read. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Nature and Selected Essays Oct 23 2020 An indispensable look at Emerson's influential life philosophy Through his writing and his own personal philosophy, Ralph Waldo Emerson unburdened his young country of Europe's traditional sense of history and showed Americans how to be creators of their own circumstances. His mandate, which called for harmony with, rather than domestication of, nature, and for a reliance on individual integrity, rather than on materialistic institutions, is echoed in many of the great American philosophical and literary works of his time and ours, and has given an impetus to modern political and social activism. Larzer Ziff's introduction to this collection of fifteen of Emerson's most significant writings provides the important backdrop to the society in which Emerson lived during his formative years. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. NICOMACHEAN ETHICS May 30 2021 EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-

making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned.
