Seeking Answers Nov 23 2020 This is a collection of abstracted thoughts of the author over the years with a variety of contents: theories, hypothesis, science fiction, remarks, comments, talks --- with topics ranging in natural science and social science. It is more philosophic than scientific. It aims on the purpose of describing an outline for a modern and rational world view. It focuses on principles. Let your mind free, but guide it by principles. That is an efficient way of thinking. A world view serves as a framework for one's knowledge and directs one's ideology. It is not a specific knowledge or skill you can make a living out of, but without a rational world view one cannot say he leads a quality life. This book can be used as a reference book for the questions you encounter in life. It arms your mind with problem solving ability.
