**Approaches to Early-medieval Art**

This book explores the media ecologies of literature – the ways in which a literary text is interwoven in its material, technical, performative, praxeological, affective, and discursive network and which determine how it is experienced and interpreted. Through novel approaches to the complex, contingent and interdependent environments of literature, this volume demonstrates how questions about the mediality of literature – particularly in the wake of digitization – shed a new light on our understanding of textuality, reading, platforms and reception processes. By drawing on recent developments in advanced media theory, *Media Ecologies of Literature* emphasizes the productivity of innovative re-conceptualizations of literature as a medium in its own right. In an intentionally wide historical scope, the essays engage with literary texts from the Romantic to the contemporary period, from Charlotte Smith and Oscar Wilde to A. L. Kennedy and Mark Z. Danielewski, from the traditionally

printed novel to audiobooks and reading apps. Adult Nursing Practice: Using evidence in care enables today's students and newly qualified nurses develop the knowledge and skills they need to deliver, and lead care tomorrow. Reflecting the principles of evidence-based care, this textbook helps students learn to manage patients with common conditions and fundamental health needs so they can provide the best possible evidence-based care every day. This is a comprehensive presentation of the theory and practice of time series modelling of environmental systems. A variety of time series models are explained and illustrated, including ARMA (autoregressive-moving average), nonstationary, long memory, three families of seasonal, multiple input-single output, intervention and multivariate ARMA models. Other topics in environmetrics covered in this book include time series analysis in decision making, estimating missing observations, simulation, the Hurst phenomenon, forecasting experiments and causality. Professionals working in fields overlapping with environmetrics - such as water resources engineers, environmental scientists, hydrologists, geophysicists, geographers, earth scientists and planners - will find this book a valuable resource. Equally, environmetrics, systems scientists, economists, mechanical engineers, chemical engineers, and management scientists will find the time series methods presented in this book useful. Focusing on early Chinese ethical and political thought

across multiple schools and thinkers, this book presents a comprehensive overview of the research being done in Chinese comparative ethics and political philosophy. In addition to chapters on Chinese comparative and interpretative thought, The Bloomsbury Research Handbook of Early Chinese Ethics and Political Philosophy brings early Chinese ethics and political philosophy into conversation with Western and Indian Philosophy, as well as Western Theology. Contributors discuss numerous texts and schools in Pre-Qin and Han Philosophy, including Confucianism, Daoism, Mohism, the Xunzi, the Liyun, and the Zhuangzi. The volume also shows how early Chinese ethical and political theories can be used to contextualise contemporary philosophical issues, such as metaethics, human rights, emotions, and the connection between ethics and metaphysics. The Bloomsbury Research Handbook of Early Chinese Ethics and Political Philosophy is an ideal resource for undergraduate and postgraduate students encountering early Chinese ethics and political philosophy for the first time. Eat Right, Swim Faster is the ultimate nutrition resource for competitive swimmers of all ages. It is a smartly written book of highly practical and very accessible information for swimmers interested in what food can do for them in their pursuit of maximum performance in the water. Rather than insisting that readers wade through a tangle of highly technical terminology, Eat Right, Swim Faster provides an

abundance of sound, practical advice, in a straightforward, non-academic tone. *Eat Right, Swim Faster* draws on the very latest sports nutrition research as well as the very personal experience of the author—a registered dietitian, sports nutritionist, swim coach, athlete, and mother of three competitive swimmers. Readers can therefore be confident they're receiving the smartest, most up-to-date information on the foods and drinks that will serve them—and their swimming performance—best. Conference papers. Companion to: *Democracy's value*. Includes Bibliographical references and index. First Published in 2010. Routledge is an imprint of Taylor & Francis, an informa company. The Palgrave Macmillan Law Masters series is a long-running and successful list of titles offering clear, concise and authoritative guides to the main subject areas, written by experienced and respected authors. This ninth edition of *Legal Method* provides a lively introduction to the nature of the English legal system and its sources, and to the techniques which lawyers use when handling those sources. The text assumes no prior knowledge and makes its content accessible by clarity of expression rather than by dilution of content. In addition to more conventional sources, writers as varied as Jonathan Swift, Alexander Pope and T. S. Eliot are cited. This is an ideal course companion for both law undergraduate and GDL/CPE students. Includes end of chapter summaries and self-test exercises. Swim better—and enjoy every

lap—with Total Immersion, a guide to improving your swimming from an expert with more than thirty years of experience in the water. Terry Laughlin, the world's #1 authority on swimming success, has made his unique approach even easier for anyone to master. Whether you're an accomplished swimmer or have always found swimming to be a struggle, Total Immersion will show you that it's mindful fluid movement—not athletic ability—that will turn you into an efficient swimmer. This new edition of the bestselling Total Immersion features:

- A thoughtfully choreographed series of skill drills—practiced in the mindful spirit of yoga—that can help anyone swim more enjoyably
- A holistic approach to becoming one with the water and to developing a swimming style that's always comfortable
- Simple but thorough guidance on how to improve fitness and form
- A complementary land-and-water program for achieving a strong and supple body at any age

Based on more than thirty years of teaching, coaching, and research, Total Immersion has dramatically improved the physical and mental experience of swimming for thousands of people of all ages and abilities. "The essays in this volume chart Derrida's dialogue with the ancient world in the context of the central concerns of his work."--Introduction, p. 12. New perspectives on the use and acquisition of a minority language. The number of young people speaking Gaelic in Scotland is growing for the first time since Census records began but less than half

of all Gaelic speakers use Gaelic in the home. This book sets out to explore why. Focusing on how people, communities and organisations are 'doing' Gaelic, this book explores the processes and patterns of Gaelic language acquisition, use and management across four key spaces of interaction: the family, the community, educational settings, and in organisations. The contributors adopt an experiential approach to give voice to speakers in a diverse range of communities, both geographically and socially, as the volume illustrates the ways in which the use of Gaelic is changing in the context of increasingly fragmented, networked communities. Gaelic in Contemporary Scotland provides a range of critical perspectives on existing models for minority language revitalisation and to introduce fresh ideas for language revitalisation theory. Through its analysis of the interconnections between, and differences within, Gaelic communities, this collection challenges old understandings of the Gaelic community as a single collective identity, making it an invaluable resource for students, lecturers and researchers interested in questions of linguistic diversity, linguistic minorities and language policy and planning. The concept of law lies at the heart of our social and political life. Legal philosophy, or jurisprudence, explores the notion of law and its role in society, illuminating its meaning and its relation to the universal questions of justice, rights, and morality. In this Very Short

Introduction Raymond Wacks analyses the nature and purpose of the legal system, and the practice by courts, lawyers, and judges. Wacks reveals the intriguing and challenging nature of legal philosophy with clarity and enthusiasm, providing an enlightening guide to the central questions of legal theory. In this revised edition Wacks makes a number of updates including new material on legal realism, changes to the approach to the analysis of law and legal theory, and updates to historical and anthropological jurisprudence. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable. Assuming no prior knowledge of philosophy, *Legal Theory* examines the relationship between law and morality, and places particular emphasis on matters of contemporary debate, such as assisted suicide and animal rights. --Book Jacket. Why do some rules have the status of law while others do not? Is law simply a matter of rules anyway? What is justice? Is there a duty to obey a law even if it is unjust? Should the law concern itself with the activities of consenting adults in private? This work asks questions such as these and explains some of the answers which legal theorists have given, from Ancient Greece to

the present day. Written in a readable style, this book aims to make intrinsically difficult material accessible and interesting. The Routledge Handbook of Sport Governance is a comprehensive and authoritative survey of the wide range of issues shaping sport governance. It considers the evolution of the sport industry from a largely amateur, volunteer-driven sector into the globalised business that it is today and examines how professionalisation has fundamentally shifted the governance landscape for sport organisations and all those working within sport. Written by a team of leading sport management scholars from around the world, the book is organised around five key themes: • Part I: Overview of sport governance • Part II: Environmental context and policy perspectives • Part III: Ownership structures and governance models: Implications for sport governance • Part IV: Board roles in the governance process • Part V: Future sport governance challenges Each chapter reviews the most recent research available and, in some cases, presents new data to support previously published studies. As sport governance is a relatively young field, each chapter maps future research needs to provide direction for sport governance scholars. A special feature of the handbook is a series of nine shorter research chapters in Part IV examining board roles in the governance process, tying theory to the day-to-day practical aspects of running a sport organisation. With broader and deeper coverage of

the key issues in contemporary sport governance than any other book, this handbook is essential reading for students, researchers and practitioners in sport business and management. `A new book by John McLeod is always a treat and, like good qualitative research, takes the reader by surprise, and shows him or her something new. The revelation to me in this book is its focus on philosophy (rather than psychology) and on John's insistence that qualitative research is rooted in a mixture of phenomenology and hermeneutics. Those of us engaged in qualitative research are challenged to underpin our work with a deeper awareness of relevant philosophy with Chapters 2, 3 and 4 offering a good starting point. This book might not be seen then as being for the novice researcher who, in any case, would be best advised to start with one of John's earlier books: *Doing Counselling Research* (SAGE,1994) or *Practitioner Research in Counselling* (SAGE,1999). However, many parts of this book are essential reading for those beginning qualitative research. The first half of Chapter 9, for example, 'How to Do Qualitative Research?' is rich material, as is Chapter 6, which explores grounded theory, referred to by John as the 2market leader2 in qualitative research. Chapter 10 takes a critical stance on randomized controlled trials before arguing the case for using qualitative outcomes measures: "Qualitative interviews appear to be, at present, the most sensitive method for the evaluation of the harmful effects of therapy and also for

recording its greatest successes. The standardized self-report methods used in randomized trials appear both to inhibit criticism of therapists and reporting of deterioration and also give little scope for clients to describe the hugely positive transformational experiences that can sometimes take place in counselling". `This book deeply addresses what it means to do qualitative research into counselling and psychotherapy with plenty for the novice researcher and even more for those already deeply immersed in qualitative research' - William West, *Counselling and Psychotherapy Research*

Qualitative methods are particularly suited to answering the kinds of questions that counsellors and psychotherapists need to ask about their practice. *Qualitative Research in Counselling and Psychotherapy* has therefore been written to help researchers find their way through the range of methodologies and techniques available to them. Leading expert, and bestselling author John McLeod takes the reader through each stage of the research process, explaining techniques for gathering data, writing up the study and evaluating the findings. Each qualitative method is clearly described and critically assessed in terms of its own strengths and weaknesses. Examples from actual research studies are given to show how the methods work in practice. The need to show how and why counselling works has led to an explosion of research activity. For all those involved in research - whether as part of

academic study or in practice this book will be essential reading. As an introduction to qualitative methods, this it is certain to be widely recommended on courses in counselling and counselling psychology and will also be of interest to those who provide counselling in other professional areas such as nursing and social work. The Value of the Humanities provides a critical account of the principal arguments used to defend the value of the Humanities. The claims considered are: that the Humanities study the meaning-making practices of culture, and bring to their work a distinctive understanding of what constitutes knowledge and understanding; that, though useful to society in many ways, they remain laudably at odds with, or at a remove from, instrumental use value; that they contribute to human happiness; that they are a force for democracy; and that they are a good in themselves, to be valued 'for their own sake'. Engaging closely with contemporary literary and philosophical work in the field from the UK and US, Helen Small distinguishes between arguments that retain strong Victorian roots (Mill on happiness; Arnold on use value) and those that have developed or been substantially altered since. Unlike many works in this field, The Value of the Humanities is not a polemic or a manifesto. Its purpose is to explore the grounds for each argument, and to test its validity for the present day. Tough-minded, alert to changing historical conditions for argument and changing styles of rhetoric, it promises

to sharpen the terms of the public debate. Solaris Rising is the first in an exciting new series of anthologies that are set to reaffirm Solaris's proud reputation for producing high quality science fiction. Featuring all original short stories from many best-selling authors such as Peter F. Hamilton, Alastair Reynolds, Stephen Baxter, Paul di Filippo, Adam Roberts, Lavie Tidhar, Ian Watson, Ken MacLeod, Mike Resnick, Tricia Sullivan, Eric Brown, Steve Rasnic Tem along with other top name authors; stories guaranteed to surprise, thrill and delight, demonstrating why science fiction remains the most innovative, satisfying, and downright exciting genre of all. Science fiction-roman. Legal terminology need not be intimidating or obscure. This is the ideal introduction to the meaning of the core vocabulary which confronts anyone approaching the study of Law for the first time. It includes clear explanations of Latin words and phrases. The 2nd edition has been thoroughly updated and revised throughout. Studying Law introduces students to the fundamental legal skills that they will need to successfully study the subject, such as case analysis, legislative interpretation, problem solving and essay writing, and to the core Law subjects themselves and the distinctions between them. "The four essays in this volume constitute Derrida's most explicit and sustained reflection on the art work as pictorial artifact, a reflection partly by way of philosophical aesthetics (Kant, Heidegger), partly by way of a commentary on art

works and art scholarship (Van Gogh, Adami, Titus-Carmel). The illustrations are excellent, and the translators, who clearly see their work as both a rendering and a transformation, add yet another dimension to this richly layered composition. Indispensable to collections emphasizing art criticism and aesthetics."—Alexander Gelley, Library Journal Publisher: Bellissima Publishing, LLC Imprint: Bellissima Publishing ISBN/SKU: 0977191680 ISBN Complete: 0-9771916-8-0 Title: Mind Training For Swimmers Publication Date: 11/25/2005 Language: English Book Description (formally called "Annotation"): "Mind Training For Swimmers" is truly everything you ever could want to know about positive thinking and how to improve your swim or sport performance. Written by Craig Townsend, Australia's Swim Guru, it is filled with examples and teaching points that are sound, thorough, and based upon solid scientific thinking. The author is the Director of It's Mind over Matter in Sydney, Australia; and he has worked in the area of mental training for swimming, sports and personal development for over fifteen years! He possesses a Diploma in Clinical Hypnosis, and for over twenty years he has researched and experimented with various methods of tapping the potential of the human mind. His program has received world recognition, and has now been put into book form. Bellissima Publishing, LLC is proud to have Craig Townsend among its writers. This is a must read book that should be

required reading for every swim coach and swimmer! It is a book that can help anyone move towards positive thinking and self-recognition. This comprehensive volume shows how to use both diagnostic and behavioral assessment knowledgeably and effectively throughout the process of treatment. The two traditions have developed along separate paths--each with its own conceptual underpinnings and psychometric strengths. Used together, they can produce a complete picture of a child's or adolescent's needs and strengths. The expert editors and contributors describe the full range of evidence-based assessment tools and illustrate their application with two intake-to-termination case examples, both based on DSM-5. Reproducible tools include a behavioral recording form and a multipage case conceptualization worksheet that can be downloaded and printed in a convenient 8 1/2" x 11" size. The man known as Cheradenine Zakalwe was one of Special Circumstances' foremost agents, changing the destiny of planets to suit the Culture through intrigue, dirty tricks and military action. The woman known as Diziet Sma had plucked him from obscurity and pushed him towards his present eminence, but despite all their dealings she did not know him as well as she thought. The drone known as Skaffen-Amtiskaw knew both of these people. It had once saved the woman's life by massacring her attackers in a particularly bloody manner. It believed the man to be a lost cause. But not even its machine could see the

horrors in his past. Ferociously intelligent, both witty and horrific, **USE OF WEAPONS** is a masterpiece of science fiction. See how to achieve stronger starts, more explosive turns, and faster times! **Swimming Anatomy** will show you how to improve your performance by increasing muscle strength and optimizing the efficiency of every stroke. **Swimming Anatomy** includes 74 of the most effective swimming exercises, each with step-by-step descriptions and full-color anatomical illustrations highlighting the primary muscles in action. **Swimming Anatomy** goes beyond exercises by placing you on the starting block, in the water, and into the throes of competition. Illustrations of the active muscles for starts, turns, and the four competitive strokes (freestyle, breaststroke, butterfly, and backstroke) show you how each exercise is fundamentally linked to swimming performance. You'll also learn how exercises can be modified to target specific areas, improve your form in the water, and minimize common swimming injuries. Best of all, you'll learn how to put it all together to develop a training program based on your individual needs and goals. Whether you are training for a 50-meter freestyle race or the open-water stage of a triathlon, **Swimming Anatomy** will ensure you enter the water prepared to achieve every performance goal. **Drafting Legislation** sets out to prove Sir William Dale's doctrine that the rules for drafting good quality legislation are the same in common and civil systems of law.

Legislative solutions can therefore serve the drafter, the judge and the practitioner of any jurisdiction. The book discusses the general issue of quality in legislation from the legislative process to the actual drafting interpretation and enforcement. It also analyzes topics related to quality in legislation such as clarity, precision and disambiguity, plain language and gender-neutral language and assesses whether Sir William's view of universality in the definition and elements of quality in legislation is right or not. The volume is of critical interest to students and scholars of European law and the philosophy and theory of law. Why do some rules have the status of law while others do not? Is law simply a matter of rules anyway? What is justice? Is there a duty to obey a law even if it is unjust? Should the law concern itself with the activities of consenting adults in private? Legal Theory asks questions such as these, discusses topical issues such as animal rights and assisted suicide, and explains some of the answers which legal theorists have given from Ancient Greece to the present day. "A major work by a master writing at the top of his form." —Publishers Weekly In the ninety-ninth year of the Age of Light, Alice Meynell has fought her way up to Greatgrandmistress of the Guild of Telegraphers, and is determined not to let even the consumption which is ravaging her son stand in the way. What follows, through a long, hot summer in the great house of Invercombe overlooking the Bristol Channel, changes

not only their lives but those of everyone in England, and perhaps the whole known world. The House of Storms follows on from double World Fantasy Award-winner Ian R MacLeod's The Light Ages in creating a vividly three-dimensional vision of a landscape and a society both very like, but also wonderfully different from, our own. Part fantasy and part history, and filled with compelling characters and a deep sense of place, the story he tells is uniquely powerful and strange. Praise for The House of Storms: "MacLeod is set to become a writer of the magnitude of Dickens or Tolkien." —The Guardian "MacLeod's ability to tell a tale that blends history-in-the-making with the stories of men and women who make that history renders this chronicle of love, war, and human aspiration a strong addition to any fantasy collection." —Library Journal "In the end, as compelling as the plot may be, readers will find themselves slowing down, holding back, turning the pages with deliberate care. For the world MacLeod creates, the characters who live there, the schemes and terrors they find themselves involved in are so real, so beautifully rendered, that readers will not want to leave them behind." —Interzone In 1998 the author, a professional prankster, trademarked the phrase "freedom of expression" to show how the expression of ideas was being restricted. Now he uses intellectual property law as the focal point to show how economic concerns are seriously eroding creativity and free speech. Contains

seven contributions rejecting essentialist constructions in traditional art-historical analysis. Topics include iconoclasm and identity in early-medieval art, magic and money in the early Middle Ages, and the construction of sanctity in early medieval saints' shrines. First published as a special issue of *Speculum: A Journal of Medieval Studies* (October 1997). Includes bandw maps, illustrations. Lacks an index.

Distributed by the U. Press of Kansas. Annotation copyrighted by Book News, Inc., Portland, OR "In memory of Sir William (Leonard) Dale KCMG (1906-2000)."--Page [ii]. A coming-of-age story about pursuing your dreams and what happens when reality gets in the way. Perfect for fans of Caitlin Moran, Nick Hornby & Ricky Gervais. It's 1992 and Horace dreams of becoming a rockstar with his band the Pointy Birds. The only problem is that his day-job (mis-)filing vinyl in a Soho record store is stealing all his time and energy, plus rival bands like Suede, Blur, Pulp and Radiohead are moving on to bigger and better things. But then someone called Ricky offers his services as a band manager and at last the dream can start. *Anoint My Head* is the tale of a band who didn't become rich, or famous but had a manager who did. It is also the story of a musical era, and documents the rise of some of the biggest British Britpop bands of the nineties, plus a comedian who went on to write quite a successful sitcom about a paper merchants in Slough. *The Pointy Birds*...bland and inoffensive...with a seriously

overacting singer.' NME In the past, the main difficulties in structural analysis lay in the solution process, now model development is a fundamental issue. This work sets out the basic principles for structural analysis modelling and discusses basic processes for using modern software. "The name: What does one call thus? What does one understand under the name of name? And what occurs when one gives a name? What does one give then? One does not offer a thing, one delivers nothing, and still something comes to be, which comes down to giving that which one does not have, as Plotinus said of the Good. What happens, above all, when it is necessary to sur-name, renaming there where, precisely, the name comes to be found lacking? What makes the proper name into a sort of sur-name, pseudonym, or cryptonym at once singular and singularly untranslatable?" Jacques Derrida thus poses a central problem in contemporary language, ethics, and politics, which he addresses in a linked series of the three essays. Passions: "An Oblique Offering" is a reflection on the question of the response, on the duty and obligation to respond, and on the possibility of not responding--which is to say, on the ethics and politics of responsibility. *Sauf le nom* (Post Scriptum) considers the problematics of naming and alterity, or transcendence, raised inevitably by a rigorous negative theology. Much of the text is organized around close readings of the poetry of Angelus Silesius. The final essay, *Khora*, explores the

problem of space or spacing, of the word khora in Plato's *Tmaeus*. Even as it places and makes possible nothing less than the whole world, khora opens and dislocates, displaces, all the categories that govern the production of that world, from naming to gender. In addition to readers in philosophy and literature, Khora will be of special interest to those in the burgeoning field of "space studies"(architecture, urbanism, design). Unsurpassed as a text for upper-division and beginning graduate students, Raman Selden's classic text is the liveliest, most readable and most reliable guide to contemporary literary theory. Includes applications of theory, cross-referenced to Selden's companion volume, *Practicing Theory and Reading Literature*. We all have a story to tell. Each of us has a life which has had trials and tribulations. Sometimes massive ones, and sometimes not. Dogs' are much the same. This book is the stories of some of the lives, trials and tribulations that I have encountered both as a dog owner and a dog training professional. "Todd's Ian Rutledge mysteries are among the most intelligent and affecting being written these days." —Washington Post Critics have called Charles Todd's historical mystery series featuring shell-shocked World War One veteran Inspector Ian Rutledge "remarkable" (New York Times Book Review), "heart-breaking" (Chicago Tribune), "fresh and original" (South Florida Sun-Sentinel). In *A Lonely Death*, the haunted investigator is back in action, trying to solve the murders of

three ex-soldiers in a small English village. A true master of evocative and atmospheric British crime fiction, Charles Todd reaches breathtaking new heights with *A Lonely Death*—a thrilling tale of the darkness in men’s souls that will have fans of Elizabeth George, Martha Grimes, and Anne Perry cheering. Despite its increasing visibility as a social issue, mass incarceration - and its inconsistency with core democratic ideals - rarely surfaces in contemporary political theory. *Democratic Theory and Mass Incarceration* seeks to overcome this puzzling disconnect by deepening the dialogue between democratic theory and punishment policy.

Section I: Reaction time and mental speed

1. Ageing and response times: a comparison of sequential sampling models, Roger Ratcliff, Anjali Thapar, Philip L. Smith & Gail McKoon
2. Inconsistency in response time as an indicator of cognitive ageing, David F. Hulstsch, Michael A. Hunter, Stuart W. S. MacDonald & Esther Strauss
3. Ageing and the ability to ignore irrelevant information in visual search and enumeration tasks, Elizabeth A. Maylor & Derrick G. Watson
4. Individual differences and cognitive models of the mind: using the differentiation hypothesis to distinguish general and specific cognitive processes, Mike Anderson & Jeff Nelson
5. Reaction time parameters, intelligence aging and death: the West of Scotland Twenty-07 study, Ian J. Deary & Geoff Der
6. The wrong tree: time perception and time experience in the elderly, John Wearden

Section II:

Cognitive control and frontal lobe function 7. The chronometrics of task-set control, Stephen Monsell 8. An evaluation of the frontal lobe theory of cognitive ageing, Louise H. Phillips & Julie D. Henry 9. The gateway hypothesis of rostral prefrontal cortex (area 10) function, Paul W. Burgess, Jon S. Simons, Iroise Dumontheil & Sam J. Gilbert 10. Prefrontal cortex and Spearman's g, John Duncan Section III: Memory and age 11. On reducing age-related declines in memory and executive control, Fergus I. M. Craik 12. Working memory and ageing, Alan Baddeley, Hilary Baddeley, Dino Chincotta, Simona Luzzi & Christobel Meikle 13. The own-age effect in face recognition, Timothy J. Perfect & Helen C. Moon Section IV: Real-world cognition 14. Cognitive ethology: giving real life to attention research, Alan Kingstone, Daniel Smilek, Elina Birmingham, Dave Cameron & Walter Bischof 15. Are automated actions beyond conscious access?, Peter McLeod, Peter Sommerville & Nick Reed 16. Operator functional state: the prediction of breakdown in human performance, Robert J. Hockey
