PAIS 2022 Jul 21 2022 Artificial Intelligence (AI) is a central topic in contemporary computer science; one which has enabled many groundbreaking developments that have significantly influenced our society. Not only has it proved to be of fundamental importance in areas such as medicine, biology, economics, philosophy, linguistics, psychology and engineering, but it has also had a significant impact in a number of fields, including e-commerce, tourism, e-government, national security, manufacturing and other economic sectors. This book contains the proceedings of PAIS 2022, the 11th Conference on Prestigious Applications of Artificial Intelligence, held in Vienna, Austria, on 25 July 2022 as a satellite event of IJCAI-ECAI 2022. The PAIS conference invites papers describing innovative applications of AI techniques to real-world systems and problems, and aims to provide a forum for academic and industrial researchers and practitioners to share their experience and insight on the applicability, development and deployment of intelligent systems. A total of 18 full-paper submissions and 4 extended-abstract submissions were received for the 2022 conference, of which 10 full papers and 3 extended abstracts were accepted after rigorous peer review. The topics covered range from autonomous navigation, air traffic control and satellite management to the optimization of industrial

processes and human-in-the-loop applications. The book will be of interest to all those whose work involves the innovative application of AI techniques to real-world situations.

High Stakes Dec 02 2020 Spending a year as teachers at one of the poorest elementary schools in Louisiana, the authors witnessed first hand the damages of the standards and accountability measures forced on poor children. They present their story in journal form, demonstrating how the poverty of the children, the lack of resources of the schools, the

demoralization of teachers, and the imposition of the accountability "reforms" are some of the prime factors for the failure of American education. They offer advice for some real reform that would focus on the economic inequality of school districts.

A Rouge's Gallery May 07 2021 Nikos Rallis is the definitive high-risk investor, whose avarice entraps even the most savvy members of the international business community. He fluidly skirts legal barriers in Monaco, Switzerland, and the United States. His roguish pixie dust suffocates astute targets with outrageous promises of reward. Savvy women front his schemes, captivated only slightly by his charms but much more by the opportunity to share his gains. Perched in his Alpine headquarters, the obsessive secrecy of Switzerland and strategic purpose of Chinese foreign investment become veiled money-laundering tools for his exploitation of a defense contract in Washington's easy-money climate. Ultimately, his chilling gallery of plundered emotions produces a fatal result that even his legendary diligence never anticipated.
