The Military Railroad Journey of Chicago and Northwestern Locomotive Engineer Frank Pelletier 1942 to 1945 and Beyond Mar 16 2022 There aren't many, if any, personal histories of combined railroad military training and railroad operations in wartime told by the person who lived the experiences between 1942 and 1945 on the Chicago and Northwestern, the Santa Fe and the White Pass and Yukon Railroads. This book does just that and more via the thoughtful and witty pen and photos Frank Pelletier left us. A date specific timeline parallels military actions with the activities of the principals personal life. Letters Frank sent home link events to photos and thereby graphically tell the story of unique times and places in American history. The White Pass and Yukon Railroad is but 111 miles long, built out of rock at close to maximum allowable 4 per cent grade. It was finished in 1900 to support the Yukon "Gold Rush". The railroad is dangerous year-round with hazards like snow and rock slides and washouts from flooding. It was never operated in winter until the US Army did in 1943 and 1944 due to urgent wartime logistical demands. There are many stunning photos of the hazards and dangerous operating conditions during winter operations on the White Pass and Yukon RR that have never been shown before. Due to the uniqueness of Frank's experiences and how he artfully presents his most creative thoughts in writing, this book has proven to be exceptional reading, even for those not interested in railroad subjects. Includes over 200 photos and graphic images.

Reflections of a Civil War Locomotive Engineer Jan 14 2022 The lives of ordinary men can illuminate history in ways that stories of great men may not. Separated as adolescents in Canada, reunited by the US Civil War, brothers John and Francis Bailey forge bonds which ensure their survival in the turbulent years that follow. This historical biography presents America's pursuit of her Manifest Destiny through the eyes of a Michigan railroad

engineer and an Albany NY policeman, based on the trove of documents John Bailey collected over nearly half a century. He gives us an insider's view of the expansion of the US railroad system, including detailed descriptions of the workings of steam engines and the Brotherhood of Locomotive Engineers. And, as he tells the story, often referring to letters received from Francis over the course of 36 years, John finally discovers his brother's secret for enjoying life despite adversity.

Amtrak Training Jan 26 2023 Pursuant to a congressional request, GAO evaluated Amtrak's training programs for new locomotive engineers, assistant conductors, signal maintainers, and mechanics (carmen) and foremen in the Amtrak Mechanical Department. GAO found that: (1) the engineer training program is centrally designed and managed, mandatory for all new engineers, and designed to be consistently delivered to all trainees; (2) the assistant conductor training is centrally developed and mandatory for all new assistant conductors; (3) Amtrak promotes trainees to positions as signal maintainers without ensuring that they complete important classroom training; (4) Amtrak's training programs for most of its carmen and mechanical foremen are not centrally designed and managed or consistently applied; (5) Amtrak does not routinely train its foremen in the multiple crafts they supervise; and (6) foremen are expected to decide whether carman trainees have the skills to become fully qualified carmen when they may not have the technical skills to make this determination.
